Education

Maastricht University
Maastricht, NL
Sep 2025- present

- Research Master in Economics and Financial Research. GPA: 8.25/10

Alma Mater Studiorum – University of Bologna
Bologna, Italy
Sep 2022-Jul 2025

- Bachelor's degree in Economics, Politics and Social Sciences. GPA: 28.7/30
- Graduation date: 24/07/2025. Final grade: 110 cum laude/110

Technological University Dublin (TUD)
Dublin, Ireland
Jan 2024 – May 2024

- Erasmus Program Semester on Business Administration and Marketing. GPA: 82/100

Selected Research Projects

- **Does Energy Cause Growth? Evidence from Spanish, Italian and French Energy Markets** – Empirical Econometrics 2, 9/10, Maastricht University
  - Applied a High-Dimensional Bayesian VAR (Minnesota Prior, Gibbs sampling) and Time-Varying Parameter BVAR across 40+ monthly variables to compare energy production mixes and macroeconomic performance in France, Italy and Spain (2007–2024).
  - Recovered regime-specific IRFs and FEVDs for three major shocks (2012 sovereign debt crisis, Covid-19, 2022 energy crisis), demonstrating that domestically diversified energy mixes reduce macroeconomic vulnerability and that a feedback relationship holds on the supply-side channel.
- **Reassessing the ARRA Employment Multiplier: A Continuous Treatment Approach** – Panel Data Econometrics, 9.5/10, Maastricht University
  - Reassessed the American Recovery and Reinvestment Act's employment multiplier utilizing a harmonized state-level panel (2007–2011) by transitioning from baseline IV cross-sectional estimation to the novel CGBS continuous treatment estimator.
  - Quantified heterogeneous, time-compounding employment effects across dosage cohorts to compute standardized cost-per-job multipliers.
- **A Study in Banking Competition: Illinois Banking Market (1984–2020)** – Financial Markets and Intermediaries, 8/10, Maastricht University
  - Evaluated the evolution of market power via EIO frameworks on 113,000+ FDIC Call Reports; estimated demand elasticity via 2SLS IV and Lerner Indices using Average Variable Cost accounting proxies
  - Applied TWFE and critical mass thresholds to identify spatial divergence in rent extraction across four distinct regulatory eras.
- **Labor and AI: A Simulation Exercise** – Research Strategy, 9/10, Maastricht University
  - Designed a two-DGP R simulation (1,000 regions, 20 years) with group-specific Cobb-Douglas production functions imposing AI-driven displacement of high-skill workers and TFP complementarity for mid-skill workers under both discrete and continuous treatment definitions.
  - Demonstrated TWFE bias under staggered adoption via Goodman-Bacon (2021) decomposition; recovered unbiased dose-specific causal responses using Sun & Abraham (2021) and a manually implemented continuous-treatment CGBS (2025) estimator.
- **Replication of "The China Syndrome (Autor et al. 2013)"** – Empirical Econometrics I, 8.5/10, Maastricht University
  - Fully replicated the original identification strategy (converting 1,500+ lines of STATA to R); extended the empirical specification with five additional models to evaluate potential omitted variable bias, lag structure choices, and fixed-effects design.
  - Reassessed statistical inference using clustered and exposure-robust standard errors (Borusyak et al., 2022) to evaluate inferential validity in modern trade IV literature.
- **West Germany Postwar Growth: Human Capital & Immigration** – Macroeconomics I, 8.5/10, Maastricht University
  - Calibrated five alternative growth-accounting frameworks in Julia (1,000+ lines) on a harmonized dataset of 11 archival time series to infer latent investment, human capital and migration dynamics driving the Wirtschaftswunder.

Technical Skills

- Statistical Software:
  - R (Advanced – Quarto, tidyverse, dplyr, AER, lmtest, sandwich, factoextra, ggplot2, modelsummary)
  - STATA (Medium – panel data analysis, IV estimation)
- Programming Languages
  - C++ (Medium)
  - Julia & PlutoNotebook (Medium)
  - Python (Basic)

Professional Experience

Research Centre for Education and Labour Market (ROA) – Research Assistant

Maastricht, Netherlands
Sept 2026-

Topic – Low-skilled Labour: Demand and Supply developments in era of Digitalization

- Develop a research plan
- Conduct literature review
- Construct a dataset based on microdata
- Build and apply different identification strategies and robustness checks
- Report results and findings

Fradiavolo Pizzeria – Team Leader

Bologna, Italy
Nov 2024-June 2025

- Worked as a supporting manager for a team of over 20 people
- Built customer care and improved online rating from 3.3 to 3.9 on Google
- Managed cash flows, payments and deposits for nearly €2000 every day
- Coordinated daily food supply orders
- Scheduled shifts

Roadhouse Steakhouse & Fradiavolo Pizzeria – Waiter

Bologna, Italy
Feb 2023-Jan 2024
Aug 2024-Nov 2024

- Serving of food and drinks
- Took orders and coordinated the work between the floor and the kitchen
- Built and improved relationships with the customer

Primark – Warehouse Operator

Bologna, Italy
Aug 2022 - Dec 2022

- Execution of the assigned warehouse operations in coordination with other departments of the shop.
- Collaborating for the maintenance of a warehouse counting more than 10,000 products
- Daily updated the inventory systems and processed incoming orders

Leadership & Volunteering

- **Volunteer** – Wadi Rum Tourist Camp, Jordan (2023), Bacho Catholic Clinic, Ethiopia (2017), Siuyu Children's Rehabilitation Centre, Tanzania (2015)
  - Contributed to community development initiatives, including healthcare facility support and assistance for children in vulnerable conditions.
  - Contributed to the development of a desert tourist camp by providing infrastructural and marketing support.
- **Associate Membe**r of Negotiation Project Maastricht 2025/2026

Skills & Certifications

- Language: Italian (native speaker), English (full-working proficiency), Spanish (basic level proficiency)
- Certifications: Negotiation Project Maastricht (2026), Customer NextGen Certificate (Italian Private Banking Association (2024)) , HACCP Certification for food operators (AISiLIA, 2024), Worker Safety in low-risk Activities (AISiLIA, 2024)
